ELIOT

BAREFOOT CLIMBING SHOES

Toe box

Controversy in climbing.
Wide toebox ensures a lot of
comfort, while the rest of the
construction of the shoe allow
to climb easily.

Flat sole?

Unique and patented
design of flat climbing shoes.
These are shoes for people
who can not stand the pain
when wearing normal
climbing shoes.

Lacing system

Laces goes from the toe
asymmetry to tighten the
shoe perfectly around your
feet. As you could have not
much free space at front.

Round Edge

Round edge of rubber at the front for
increased sensibility to get the most
out of the shoes while compensating
the construction. Eliots are made for
easier climbing, please don't expect
to climb 10 grades from it.

ELIOT

ROUTESETTER CLIMBING SHOES

Toe box

Controversy in climbing.
Wide toebox ensures a lot of
comfort, while the rest of the
construction of the shoe allow
to climb easily.

Flat sole?

Unique and patented
design of flat climbing shoes.
These are shoes for people
who can not stand the pain
when wearing normal
climbing shoes.

Lacing system

Laces goes from the toe
asymmetry to tighten the
shoe perfectly around your
feet. As you could have not
much free space at front.

Difference?

The routsetter version has same
shape and construction, but also
has a support in arch area - to make
easier standing on ladder. Also front
part of sole is non-marking.

GURU EVO

CLIMBING SHOES

Sole: Extasy HG®

Midsole: Stifflex® 1.4 mm

Upper: Lorenzi Microfibre

Size: 34 - 50 EU (1/2)

No holes

We removed the holes in rubber to make surface as big for most grip.

Sock construction

2 velcros with sock construction keep your feet in place.

Not so soft

While the Guru Evo stays comfortable and soft, its midsole ensures enough support while keeping the sensitivity.

Back in black

Guru is one of the bestsellers, so we're bringing this update to improve it a bit and make it prettier, while maintaining its strong features.

SALTIC[®]
CLIMB IMPOSSIBLE

TOXIC

PERFORMANCE CLIMBING SHOES
